

You will receive an email from Crisis GO each morning at 7:30 am to remind you to certify your student. You can either use the **Report** button in the email to certify your student, report on the website, or download the CrisisGo app.

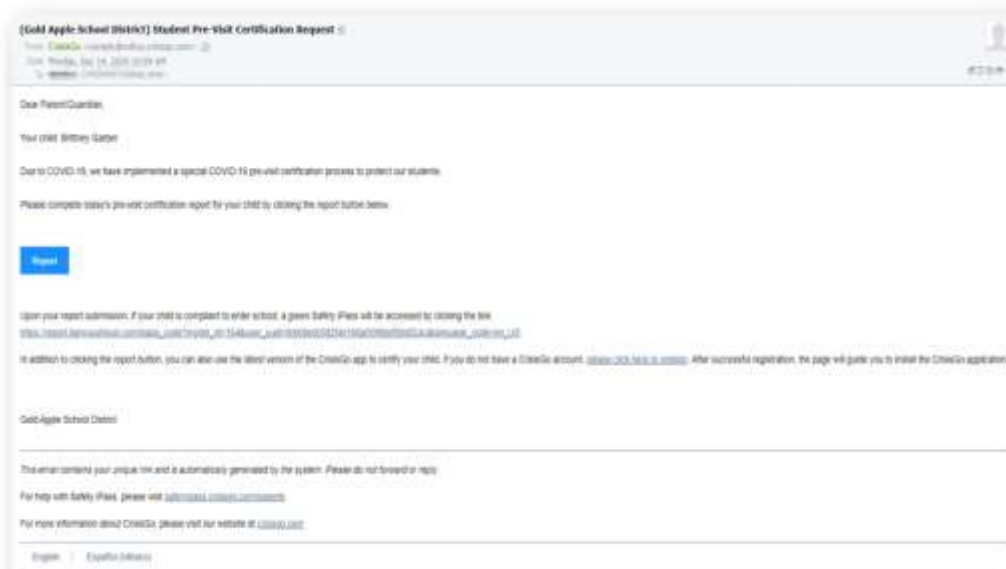

This video teaches you how to self-certify:

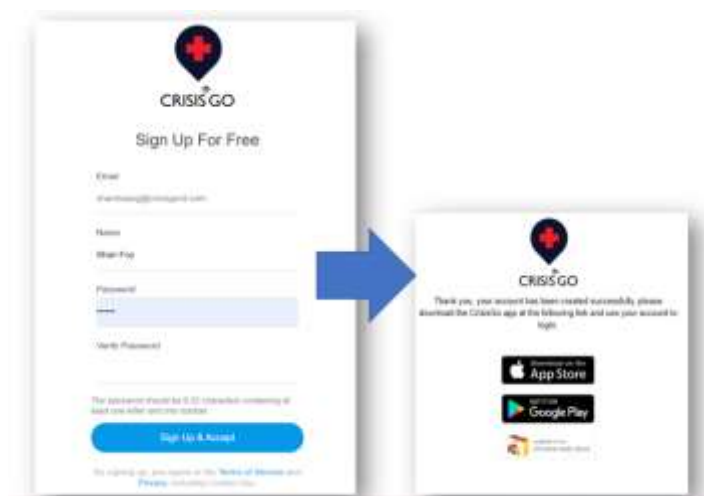

https://trainingcg.s3.amazonaws.com/Safety+iPass/Safety+iPass_Student+Self-Certification.mp4

Follow these steps to download the app and certify your student(s):

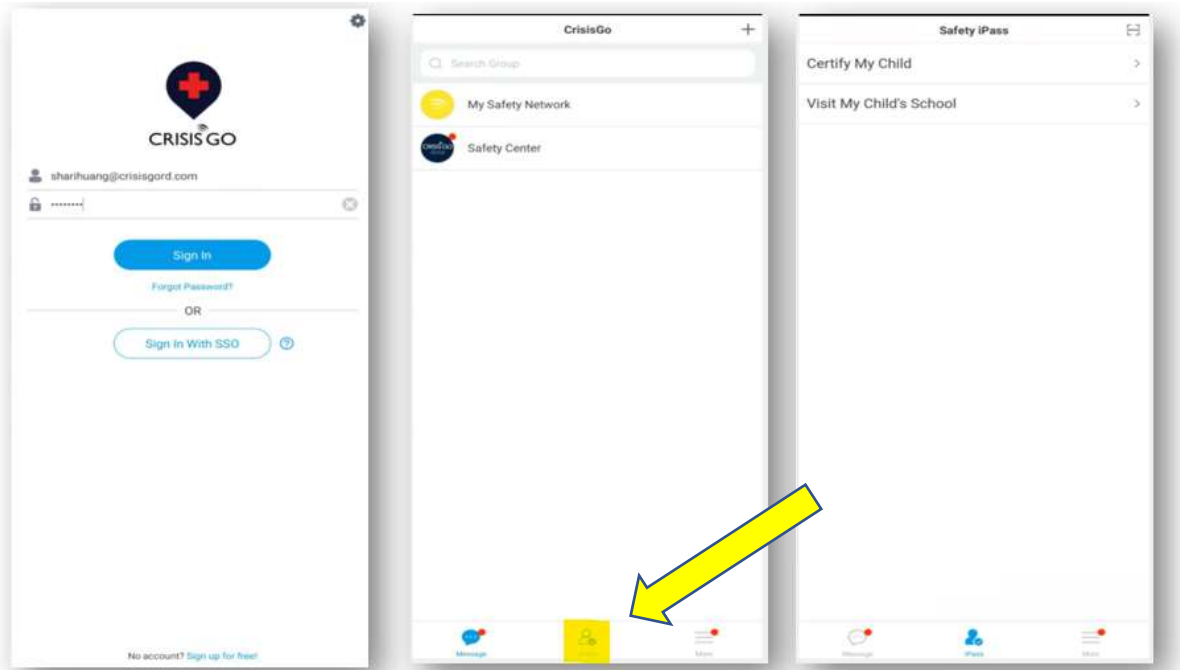

Step 1 - Register for an account by clicking the link in the student pre-visit certification email.

Step 2 - After clicking the hyperlink, your account information will auto-populate on the registration form. The last step in the process is to create a password. Once that has been completed, the page will direct you to install the CrisisGo application.

Step 3 - Once you have downloaded the app, log in using the credentials you just set up. Once you are in the app, **click the iPass tab at the bottom of the screen. This will take you to the Safety iPass screen.**

Step 4 - Once you are in the Safety iPass tab, you can select *Certify My Child* to view the associated students that need to be certified. To certify, simply tap the child's name and answer the certification questions.
